

ASDA, WORKSOP

CLIENT: ASDA

VALUE: £9.5M

BUILD PERIOD: 6 MONTHS

THE PROJECT

This project involved the construction of a New Asda Superstore including a car park, delivery yard, soft and hard landscaping and a petrol filling station. The project was given a strict 6 month timeframe which presented many challenges given the limitations enforced due to covid-19, however the team achieved practical completion on time and to budget. The Asda superstore also incorporated all of their latest company innovation and included multiple store revisions and modifications.

Due to the varying aspects of the job, this project benefitted hugely from the structure of the group which comprises of several associated divisions. The project drew services from 6 of the group's divisions, including Highways, Aggregates, Concrete, Plant hire, Civil engineering and Construction.

▶ THE PROJECT

Predominantly, it was the construction division which accounted for the majority of the work involved with this project.

The work involved installing foundations, a structural frame, cladding and roofing, glazing, M&E, internal fit out, soft landscaping and fencing. In addition, it also involved the overall management of the design and build aspects of the project.
