Pumping Services

Concrete Pump Hire

24m & 35m

Ashcourt Concrete Pumps provide versatility for placing concrete at ground, below ground and multiple floor levels. Our 24m and 35m boom pumps save time and money on placing concrete where access is an issue. They are used extensively on all types of construction projects from large industrial/commercial schemes to smaller domestic projects. All of our operators are fully trained to CPCS (Construction Plant Competence Scheme) standard for mobile pump operating, which is refreshed every 3 years to maintain competency.

For availability and hire rates please contact us on info@Ashcourt.com or 01482 442288 option 3.
