

NEWLAND HOMES REFURB

CLIENT: ASHCOURT STUDENT
ACCOMMODATION

THE PROJECT

This particular project was different to past student accommodation projects in Ashcourt's portfolio as it involved the sympathetic restoration of Grade II listed buildings. The fact that it was a restoration project brought about many challenges, however through persistence and the dedication of the Ashcourt team, those issues were able to be overcome and the project was completed on time and on budget.

Due to the sensitive nature of working on Grade 2 listed buildings, we also kept in regular contact with the council's heritage officer throughout the process to ensure that the scheme was both fit for our purpose and also retained all of the important historical features of the buildings. Each of the 13 restored buildings now house up to 12 students, each with individual standard/en-suite rooms along with grand communal kitchen and living room areas.
